Software Engineer

Software engineer with experience delivering complete projects from start to finish, including leading a full stack team. Skilled in problem-solving, project management, and collaborating effectively with teams. Passionate about learning, innovation, and building solutions that make an impact.

PROFESSIONAL EXPERIENCE

Aether Financial Services **Oct 2026 – Present**

Full Stack Developer (Alternance) – Paris, France

Independent Paris-based financial services firm: private debt agency, valuation of financial instruments, and corporate & issuer services.

- Full-stack development with **Angular** on the front end and **PHP CodeIgniter** on the back end.

YOOVO **2024 – 2026**

Full Stack Team Lead – Beirut, Lebanon

- Technical leadership of a Full Stack team: sprint organization, code reviews, and software quality assurance.
- Drove technical architecture decisions oriented toward performance, scalability, and maintainability.
- Full-stack development (Angular, React.js, C# .NET), API integration, and MySQL/SQL database management. CI/CD pipelines with Jenkins and deployment on AWS.
- Designed and deployed an **Agentic AI system** to automate development workflows, significantly reducing feature delivery time.
- Optimized team productivity through AI tools integration and mentoring of team members on best practices.

Freelance Projects **2023 – Present**

- Designed and developed multiple full-stack web and mobile applications using modern technologies.
- Implemented **responsive front-end interfaces** and scalable **back-end architectures**.
- Integrated **APIs, databases, and third-party services** to enhance application functionality.
- Applied best practices in **software development, version control, and project management**.
- Managed the full development lifecycle from **design and development to testing and deployment**.

PROJECTS

Final Year Project: WCN – Wheel In Crypto (Cryptocurrency & Driver Reward System) **2023 – 2024**

- Full-stack architecture: **Angular + .NET (web)** and **Angular Ionic + .NET (mobile)**.
- Smart contracts for automatic rewards based on driving behavior.
- Precise GPS tracking via Google Maps.
- Complete project management from front-end to blockchain back-end.

NutriClinic – Clinic Management System (private client project)

- Clients, appointments, consultations, payments, staff and audit log for a nutrition clinic.
- Next.js and TypeScript with a REST API, zod validation, Prisma and PostgreSQL.

EDUCATION

Éstiam – l'école d'informatique appliquée aux métiers **2025 – Present**

Master's in Web and Mobile Development – Paris, France

Université Antonine **2021 – 2024**

Bachelor's degree in Computer Science – Beirut, Lebanon

SKILLS

Programming Languages: C++, C#, Java, JavaScript, TypeScript, PHP, Solidity, Python, HTML, CSS, SCSS.

Frameworks and Libraries: Angular, React.js, React Native, Ionic Angular, .NET, CodeIgniter, Laravel, Django, FastAPI, Next.js, Blockly.

Cloud & Tools: Azure, AWS, Git, CI/CD, Jenkins, ClickUp.

Project Management & Analytics: Jira, Microsoft 365.

Design and UI Tools: Adobe Photoshop, Adobe Illustrator, Figma.

Certifications: Microsoft AI Skills (Microsoft AI Tour), IELTS B2, Machine Learning with Python – Anaconda (in progress), Agentic AI (in progress).

LANGUAGES & INTERESTS

Languages: French (Intermediate), English B2 (IELTS).

Interests: Blockchain, Artificial Intelligence, Machine Learning.
